

Youth Involvement in the Implementation of the Inuvialuit Settlement Region (ISR) Energy Action Plan

ISR Energy Action Plan

The ISR Energy Action Plan aims to provide a clear set of objectives and goals for Inuvialuit to pursue energy security and advocate for Inuvialuit rights to secure equitable access to energy in municipal, territorial, federal, international, and circumpolar settings. Each objective and goal represents primary areas of Inuvialuit concerns related to capacity & engagement, technology, environmental impact, energy cost, and education & energy literacy. Implementing the ISR Energy Action Plan will benefit individuals and our communities by lowering energy costs, increasing employment, and improving access to stable energy sources. IRC acknowledges that Youth play an integral role in implementing this Action Plan as Youth are invaluable contributors to a cleaner energy future.
